Mosquitoes-repelling Bulb

This is newly developed mosquitoes-repelling lamp based on mosquitoes' anti-photobiological properties. Adopting light with wavelength of 530-590 nm in lamp and this wavelength is dislike by mosquitoes. When bulb lights up, mosquitoes will keep away from it automatically, very different from the mosquitoes-killing lamp, there is no UV light or infrared ray, so this lamp is totally no harm for health. In addition, it is economic, environmental-friendly and easy to install by yourself.
